

Dear Hiring Manager,

I am writing to express my interest in opportunities within your organization that align with my background in **artificial intelligence, machine learning, and data science**. Over the past several years, I have focused on designing, building, and deploying **end-to-end AI systems** that solve real-world problems with measurable impact.

My experience spans the full machine learning lifecycle. I have developed and trained models using **TensorFlow, PyTorch, Hugging Face Transformers, scikit-learn, and XGBoost**, working across NLP, computer vision, tabular prediction, and anomaly detection. One of my recent projects, **PhishGuard AI**, combined CNNs and transformer-based architectures to detect phishing attempts at scale, achieving strong performance and efficient inference.

I have also built robust **data pipelines and automated ML workflows**, optimizing preprocessing, feature engineering, and model evaluation for speed and reliability. My deployments have involved containerized environments with **Docker**, cloud platforms such as **AWS and GCP**, and API-driven model serving. A key focus in all my work is ensuring that models are not only accurate but also **scalable, maintainable, and production-ready**.

I am passionate about contributing to innovative AI teams where I can apply my experience in deep learning, model optimization, and automation while continuing to grow as a machine learning engineer. I thrive in environments that push technical boundaries and encourage experimentation, research, and continuous improvement.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and experience can contribute to your team's AI initiatives.

Sincerely,
Clarence Obini
